

## PROSTATE THERAPY A.K.A. PROSTATE MILKING

### What is *Prostate Milking*?

To apply adequate pressure on the prostate to squeeze out the seminal fluid or build-up.

### Benefits of Prostate Therapy/Milking

It drains the highly painful build-up of seminal fluid out of the prostate. If NOT drained, the fluid in the prostate becomes stagnant and bacteria can grow which leads to prostate inflammation.

- It keeps the blood moving and delivers oxygen in the prostate.
- It increases the volume of the semen.
- It naturally shrink enlarged prostate.
- It's an effective treatment for chronic prostatitis (prostate infection).
- It protects you from premature ejaculation.
- It helps overcome ED (impotence).
- It intensifies orgasms' strength during sexual intercourse up to 100% stronger.
